| Gist of the event                | <p>The Department of Artificial Intelligence and Data Science, in association with ALGOBRIX and Institution’s Innovation Council, organized a Career Outreach 2025 Initiative Program in collaboration with Astonish Infotech Pvt Ltd. The program was designed to provide insights into industry expectations, career opportunities, and skill-building strategies for students.</p> <p>The event aimed to bridge the gap between academics and industry by equipping students with knowledge about career paths, employability skills, and future trends in Artificial Intelligence and Data Science.</p> <p><b>Event Highlights</b></p> <ul style="list-style-type: none"><li>Industry experts from Astonish Infotech Pvt Ltd interacted with students.</li><li>Students gained awareness of emerging technologies and job opportunities.</li><li>Interactive Q&amp;A session enabled students to clarify career-related queries.</li></ul> |                                                                                      |  |
| Participants feedback (50 words) | The Career Outreach program gave students valuable exposure to industry practices and upcoming opportunities in the field of AI and Data Science. The sessions motivated them to align their academic learning with real-world applications, thereby strengthening their confidence and readiness for future career prospects.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                      |  |
