

DEPARTMENT OF ARTIFICIAL INTELLIGENCE AND DATA SCIENCE

REPORT OF POSTER + ABSTRACT

Date & Time of the Event: 27.09.2025 & 1:10 PM to 3.50 PM

Event Title	Poster + Abstract	
Mode of conduction	Offline	
Number of participants	49	
Gist of the event	The Department of Artificial Intelligence and Data Science, in association with Club BRAINS and the Institution's Innovation Council (IIC), organized a Poster + Abstract event exclusively for 3rd-year AI&DS students. This event was designed for students to present their work through prototypes accompanied by structured abstracts, outlining the problem statement, objectives, methodology, and results achieved to date. The session provided an opportunity to communicate research ideas in a concise and professional manner while receiving valuable feedback from faculty members. It also served as a significant checkpoint in the project development process, fostering academic rigor, encouraging critical evaluation, and guiding students toward the successful completion of their final deliverables. <u>Event Highlights:</u> - Students presented project and demonstrating the progress made so far. - The session encouraged effective communication of technical ideas in both visual and written formats. - Constructive feedback from faculty members helped students identify strengths and areas for improvement.	
Participants feedback (50 words)	The Poster and Abstract presentation allowed students to showcase the progress of their projects in a structured and professional manner. By preparing visual displays and concise summaries, participants were able to communicate their ideas effectively while reflecting on the practical aspects of their work.. It served as a valuable step in bridging academic concepts with real-world applications, fostering skills essential for future research and industry endeavors.
